Subject Index

JOURNAL OF CHROMATOGRAPHIC SCIENCE, VOLUME 12 — 1974

1. GENERAL

1.1 Books and Directories
International Chromatography Guide G2

1.2 Bibliographies
A Bibliography of References on the Analysis of Drugs of Abuse—1972-1974 328

2. THEORY

2.1 Theory of Chromatography
Effects of Sample Size on Chromatographic Behavior.. 579
Deformation of Chromatographic Peaks Under the Influence of Mass Transfer Phenomena 822

2.2 Column Efficiency Studies
Reproducibility and Efficiency of Columns Packed with 10 μ Silica in Liquid Chromatography 139

2.3 Partition Coefficients and Thermodynamic Properties
Theoretical and Experimental Investigation of the Influence of Molecular Structure on the Retention on Graphitized Carbon Black 788

3. APPARATUS AND TECHNIQUES

3.1 Instruments, Commercial and Lab Constructed
Evaluation of the Plasma Chromatograph as a Separator-Identifier 673
High Pressure Liquid Chromatography Equipment—II 425

3.2 Sample Introduction—General
An Automatic Sequencer for Chromatographic Injections and Controls 45
Butadiene Dimer Formation in Chromatographic Vaporizers 49
Gas Chromatographic Septum Bleed Studies 101
A Sampling Technique for Subambient Pressure Systems 106
Improved Device for Injection of Pressurized Liquid Samples for GC Analysis 109
A Hand-Held Injection Guide for Microliter Capacity Syringes 381

Sample Preparation (Includes Derivatization)
Analysis of Phenols by Derivatization and High-Speed Liquid Chromatography 85
An Improved Procedure for Preparing the n-Butyl-Trifluoroacetyl Amino Acid Derivatives and Its Application in the Study of Radioactive Amino Acids from Biological Sources 349

Pyrolysis—Reaction GC
Pyrolysis GLC for the Rapid Identification of Organic Polymers 23
Development of High Resolution Pyrolysis-Gas Chromatography for the Identification of Microorganisms 796

3.3 Columns—General
Improved Column Systems for Gas Chromatographic Determination of Hydrazine Impurities 33
Optimization of Column Design and Operating Parameters in High Speed Liquid Chromatography 438
Introduction of Nitrogen Atoms on the Surface of Glass and its Application to Chromatography 641
High-Molecular Polyethyleneimine Coated Graphitized Carbon Black for Trace Determination of Strong Organic Bases 710
Gas Chromatographic Characteristics and Analytical Applications of Micropacked Columns .. 758

Capillary Columns
Manufacture and Use of the Glass Open Tubular Column 344
Use of Gas-Liquid Chromatography with Glass Capillary Columns for Steroid Trace Analysis in Tissues 545
Determination of Some Physico-Chemical Magnitudes in Tridimensional Chromatography with Chemically Bonded Phases 559
Separation and Identification of Human Urinary Dihydroxysteroids by High Resolution Glass Capillary Columns 662
The Combined Use of High Efficiency Liquid and Capillary Gas Chromatography for the Determination of Polycyclic Aromatic Hydrocarbons in Automotive Exhaust Condensates and Other Hydrocarbon Mixtures 715

3.4 Detectors—Electron Capture Detectors
A Novel Combination of Liquid Chromatography and Electron Capture Detection in the Analysis of Pesticides 695
Gas Chromatography and Electron Capture Detection of Tertiary Amines as Carbamates after Reaction with Pentafluorobenzyl Chloroformate 722

Detectors—Ionization
Parameters and Pit-Falls in the Construction and Operation of a Hydrogen-Atmosphere Flame Ionization Detector 541
Electron Capture Gas Chromatographic Determination of Copper and Nickel Beta-Ketoamine Chelates 591
Influence of Trace Helium Impurities on the Detection Limits and the Polarity of the Helium Ionization Detector Signal 807

Detectors—Liquid Chromatography
A New, Sensitive Detector for Liquid Chromatography: The Spray Impact Detector 687

Detectors—Others
A Highly Sensitive and Selective Microelectrolytic Conductivity Detector for Gas Chromatography 152
Improved Flame Photometric Detection Without Solvent Flameout 356
Simple and Inexpensive Radiation Cell for Quantitative Gas Chromatography 379
A Comparison of Photometric Detectors for High Speed Liquid Chromatography 499
A Metal Selective Microwave Emissive Detector for Gas Chromatography 585
A New Design of a Thermionic Nitrogen and Phosphorus Detector for GC 625
Design and Evaluation of Electrochemical Detectors for HPLC 747

3.9 Miscellaneous Apparatus and Techniques
Continuous Gas Chromatography 91

4. CARRIER (Gas or Liquid) AND COLUMN PACKING MATERIALS

4.2 Solid Support
Determination of Some Physico-Chemical Magnitudes in Tridimensional Chromatography with Chemically Bonded Phases 559
Experimental Study of the Distribution of Fatty Compounds Between Bi- and Tridimensional Phases at the Surface of Different Supports and of the Sorption Properties of the Films 832

4.3 Active Solids, Porous Polymers

High-Speed Radiochemical Separations by Liquid-Liquid Chromatography Using a CSP Support. I. Performance of Quaternary Ammonium Chloride-Zipax System for the Elution of Cd (II) with HCl 11
TEAE-Cellulose, A New Support for High Pressure Anion Exchange Liquid Chromatography 453
Experimental Study of Resin Design for High-Speed Ion Exchange Chromatography 458
Theoretical Study of Support Design for High-Speed Liquid and Ion Exchange Chromatography 464
The Examination of Some Commercially Available Silica Gel Adsorbents for Use in Liquid Solid Chromatography 473
High Pressure Liquid Chromatography with Porous Styrene-Divinylbenzene Polymer Packing 507
Bound-Monolayer Cation Exchangers for the Analysis of Biochemically Significant Molecular Species 555
Theoretical and Experimental Investigation of the Influence of Molecular Structure on the Retention on Graphitized Carbon Black 788

4.4 Liquid Phase

A Reconsideration of the Rohrschneider Approach for Characterizing Gas Chromatographic Liquid Phases. I. Review and Description of Basic Approach 113
A Reconsideration of the Rohrschneider Approach for Characterizing Gas Chromatographic Liquid Phases. II. Use of Four Functional Probes 119
A Nearest-Neighbor Technique Applied to the Reduction of the Number of Standard Solutes Needed to Characterize Gas Chromatographic Liquid Phases 124
Characteristics of EGS and DEGS Polyesters in Packed GC Columns 127
Cis and Trans Isomerism in Some Polyethylenic C_{18} Fatty Acids: Open-Tubular GLC Data for the Liquid Phases Butanediolsuccinate, Silar-5CP and Apiezon-L 131
Brush Type Stationary Phases with ≡Si-O-C≡ Bonding in Gas Chromatography 161
High-Performance Silicone Bonded-Phase Column Packing for Gas Chromatography 337
Selectivity in Reversed-Phase Liquid Chromatography Using Chemically Bonded Stationary Phases 433
Chemically Bonded Stationary Phases—Preparation and Application to High Speed Liquid Chromatography 486
The Selection of Preferred Liquid Phases After Classification by Numerical Taxonomy Techniques 617
Experimental Study of the Distribution of Fatty Compounds Between Bi- and Tridimensional Phases at the Surface of Different Supports and of the Sorption Properties of the Films 832
Studies of Siloxane Phases Bonded to Silica Gel for Use in High Performance Liquid Chromatography 767

5. SAMPLE TYPE

5.1 Inorganic Gases

Measurements of Dissolved Permanent Gases With a Gas Density Balance Detector 7
Gas Chromatographic Separation of Effluent from the Ammonia Oxidation Reaction: O_2, U_2, N_2O, NO_2, NH_3 and H_2O 64
Determination of Ammonia in Dilute Aqueous Alkali and in a Nitrogen-Ethylene Environment by Gas Chromatography 172
A Rapid GC Method for Analyzing Nitric Oxide Reduction Products in a Single Sample 362

5.2 Hydrocarbons—General

Butadiene Dimer Formation in Chromatographic Vaporizers 49
Radio Gas Chromatographic Determination of Petroleum Processing Products 183
The Methods for Fractionation, Analytical Separation and Identification of Polynuclear Aromatic Hydrocarbons in Complex Mixtures 606
The Combined Use of High Efficiency Liquid and Capillary Gas Chromatography for the Determination of Polycyclic Aromatic Hydrocarbons in Automotive Exhaust Condensates and Other Hydrocarbon Mixtures 715

5.3 Fatty Acids and Esters

Cis and Trans Isomerism in Some Polyethylenic C_{18} Fatty Acids: Open-Tubular GLC Data for the Liquid Phases Butanediolsuccinate, Silar-5CP, and Apiezon-L 131
Studies on Ghosting, an Important Source of Error in the Quantitative Estimation of Free Volatile Fatty Acids by GLC. I. 398
Studies on Ghosting, an Important Source of Error in the Quantitative Estimation of Free Volatile Fatty Acids by GLC. II. Effect of Sample VFA Concentration on Ghosting Magnitude and Effectiveness of Remedies to Limit Ghosting 404

5.4 Other Oxygenated Compounds (except 5.5, 5.6, 5.7)

Amino Acids

Characterization of Amino Acids by Pyrolysis/Gas Chromatography/Mass Spectrometry of their Phenylthiohydantoin Derivatives 668

Esters

High Speed Liquid Chromatographic Separations of Phthalic Esters, Carbohydrates, TCA Organic Acids and Organic Mercury Compounds 517

Phenols

Analysis of Phenols by Derivatization and High-Speed Liquid Chromatography 85
A New Method for the Gas Chromatographic Detection of Phenols 89

Steroids, Sterols and Related Compounds

Gas-Liquid Chromatographic Separation of Equine Estrogens 97
A New Rapid Method for Estimation of Urinary Pregnanediol 206
Rapid Determination of Estriol of Pregnancy by Spectrodensitometry of Thin-Layer Chromatograms 377
Analysis of Tissue Steroids by Liquid-Gel Chromatography and Computerized Gas Chromatography-Mass Spectrometry 535
Use of Gas-Liquid Chromatography with Glass Capillary Columns for Steroid Trace Analysis in Tissues 545
Steroids in the Human Newborn; Lipophilic Gel Separation and Gas Phase Analysis 636
A High Sensitive and Selective Gas Chromatographic Determination of Monohydroxy Steroids as Phosphinic Esters with the Alkali Flame Detector 658
Separation and Identification of Human Urinary Dihydroxysteroids by High Resolution Glass Capillary Columns 662
Method of Analysis of Urinary Steroids of Human Pregnancy by GLC and GC-MS of Sephadex LH-20 Chromatographic Fractions 763

5.5 Nitrogen Compounds

Gas Chromatographic Separation of Fluoropyridines Using Mixed Stationary Phases 104
Gas Chromatographic Quantitative Analysis of an Amine Hydrochloride by Regeneration of the Amine 148
Separation of Aromatic Amine Isomers by High-Pressure Liquid Chromatography on Cadmium-Impregnated Silica Gel Columns 191
An Improved Procedure for Preparing the n-Butyl-Trifluoroacetyl Amino Acid Derivatives and Its Application in the Study of Radioactive Amino Acids from Biological Sources 349
Improvements in Quantitative Gas Phase Analysis of Catecholamines in the Picomole Range by Electron-Capture Detection and Mass Fragmentography of their Pentafluorobenzylimine-Trimethylsilyl Derivatives 411
High Performance Ion Pair Partition Chromatography: The Separation of Biogenic Amines and Their Metabolites 521
High-Molecular Polyethyleneimine Coated Graphitized Carbon Black for Trace Determination of Strong Organic Bases 710

5.7 Halogenated Compounds

Gas Chromatographic Separation of Fluoropyridines Using Mixed Stationary Phases 104

5.8 Inorganic and Organometallic

GLC Analysis of Organic Chelating Agents in Steam Propulsion Systems 359
High Speed Liquid Chromatographic Separations of Phthalic Esters, Carbohydrates, TCA Organic Acids and Organic Mercury Compounds 517
Electron Capture Gas Chromatographic Determination of Copper and Nickel Beta-Ketoamine Chelates 591
A Rapid Quantitative Determination of Antimony and Arsenic in their Sulfides, Minerals, and Concentrates by Gas Liquid Chromatography 737

6. APPLICATIONS AND SPECIALIZED SEPARATIONS

6.1 Quantitative Analysis—General

Quantitative Gas Chromatography of Antibiotics 549

Trace Analysis

Improvements in Quantitative Gas Phase Analysis of Catecholamines in the Picomole Range by Electron-Capture Detection and Mass Fragmentography of their Pentafluorobenzylimine-Trimethylsilyl Derivatives 411
A Liquid Chromatography/Mass Spectrometry System Providing Continuous Monitoring with Nanogram Sensitivity 574

6.2 Qualitative Analysis

Retention Data

Computer Program for Statistical Calculation of Retention Indices 57
Factor Analysis of Some Influences on Retention Indices 366
A Mis-Application of the Retention Index System 418
To the Question of Retention Index Prediction Based on Data Related to the Molecular Structure of the Compounds 421
Author's Rejoinder 424
Prediction of Retention Data in Gas-Solid Chromatography Methyl and Polymethyl Benzenes and Naphthalenes on Graphitized Carbon Black 839
Data Analysis Methodology: The DARC Topological System 811

Other Identification Techniques

Significant Aspects of Molecular Weight Chromatography 1

6.3 Preparative Application

Description and Performance of an 8 cm i.d. Column for Preparative Scale High Pressure Liquid-Solid Chromatography 564

6.5 Applied Chemistry

Bound-Monolayer Cation Exchangers for the Analysis of Biochemically Significant Molecular Species 555

Drugs of Abuse

Screening for the Major Methadone Metabolite and Methamphetamine in Urine 67
Current Status of Blood Alcohol Methods 209
A Review of Breath Alcohol Methods 214
The Detection of Sedative Hypnotic Drugs in the Impaired Driver 219
Emergency Hospital Toxicology 225
The Identification of Barbiturates from Biological Specimens 228
The Identification of Non-Barbiturate Hypnotics from Biological Specimens 237
Methods for the Analysis of Morphine and Related Surrogates: Current Status 245
Performance Evaluation in the Toxicology Laboratory 254
Antiepileptic Drugs: A Current Assessment of Simultaneous Determination of Multiple Drug Therapy by Gas-Liquid Chromatography—On Column Methylation 256
A Review of Some GLC-FID Derivatization Techniques Found Useful in Forensic Toxicology.. 261
Thin-Layer and Gas Chromatographic Identification of LSD 265
Isolation and Identification of Methaqualone from Post-Mortem Tissues 267
Comparison of Methods for Detection of Amphetamines, Cocaine and Metabolites 269
Chemical Evaluation of 'Drug Cocktails' in Autopsy Specimens 281
Identification of Active Drug Principles in Natural Products 285
Drug Analysis by Immunoassays 293
A Single Extraction Thin-Layer Chromatographic Method in Current Use 297
Quantitative Spectrodensitometry of Morphine and Amphetamine in Thin-Layer Chromatograms.. 300
A Comprehensive GC-MS Reference Data System for Toxicological and Biomedical Purposes 304
A Bibliography of References on the Analysis of Drugs of Abuse—1972-1974 328
Use of High Pressure Liquid Chromatography for the Separation of Drugs of Abuse 512
Anticonvulsant Drug Monitoring by GC-MS-COM Techniques 630
High Pressure Liquid Chromatographic Analysis of Barbiturates in the Picomole Range by Fluorometry of the DANS-Derivatives 655

Forensic Chemistry

Chromatography and Forensic Chemistry 529

Pesticides

Analysis of Carbamate Insecticides by Fluorogenic Labelling and High-Speed Liquid Chromatography 40
Pesticides: Recovery from Plasticized PVC and Analysis by GLC 149
A Novel Combination of Liquid Chromatography and Electron Capture Detection in the Analysis of Pesticides 695
Gas Chromatography and Electron Capture Detection of Tertiary Amines as Carbamates after Reaction with Pentafluorobenzyl Chloroformate 722

Pharmaceuticals

Gas Chromatographic Assay for the Antibiotic Spectinomycin 373
Methylphenidate Blood Plasma Levels in the Horse Determined by Derivative Gas-Liquid Chromatography—Electron Capture 382
Quantitative Gas Chromatography of Antibiotics 549
Chromatographic Analysis of Heptaene Macrolide Antibiotics 613
High Performance Ion Pair Partition Chromatography: the Separation of Thyroid Hormones and Sulfa Drugs 678
Gas Chromatography-Mass Spectrometry of Catecholamines and Tryptamines: Determination of Gas Chromatographic Profiles of the Amines, Their Precursors and Their Metabolites 701
Determination of Psychotropic Drugs and Their Metabolites in Blood by High Pressure Liquid Chromatography 779
Separation and Analysis of Psychopharmacologic Drugs by High Efficiency Liquid Chromatography.. 742

Pollutants

The Combined Use of High Efficiency Liquid and Capillary Gas Chromatography for the Determination of Polycyclic Aromatic Hydrocarbons in Automotive Exhaust Condensates and Other Hydrocarbon Mixtures 715
Gas Chromatography in Environmental Analysis 36
Need for Standard Referee GC Methods in Atmospheric Hydrocarbon Analyses 80
The Determination of Organic Volatiles in Air Pollution Studies: Characterization of Profiles 175
Fingerprinting Techniques As Aids in the Analysis of Composite Chemical Pollutants in the Environment 599
Determination of Hydrocarbons in Sea Water Using an Electrolytic Stripping Cell 845

Polymers

Pyrolysis GLC for the Rapid Identification of Organic Polymers 23

Miscellaneous

Chemical Studies on Tobacco Smoke XXIV. A Quantitative Method for Carbon Monoxide and Carbon Dioxide in Cigarette and Cigar Smoke 70
Routine Gas Chromatographic Component Profiling of Cigarette Smoke for the Identification of Biologically Significant Constituents 385

7. OTHER CHROMATOGRAPHIC RELATED TECHNIQUES

7.1 Chromatographic Techniques

Gel Permeation (Filtration)

Gel Permeation Chromatography of Alkyd Resins 59
Analysis of Tissue Steroids by Liquid-Gel Chromatography and Computerized Gas Chromatography-Mass Spectrometry 535
Recycle Gel Permeation Chromatography: Application to the Separation of Some Diastereoisomers Through Molecular Interaction Effects 683
The Influence of Hydrogen Bonding Upon Gel Permeation Chromatography 730

Ion Exchange

The Performance of Packings in High Speed Liquid Chromatography IV. A Chemically Bonded Anion Exchanger 449
TEAE-Cellulose, A New Support for High Pressure Anion Exchange Liquid Chromatography 453
Experimental Study of Resin Design for High-Sped Ion Exchange Chromatography 458
Theoretical Study of Support Design for High-Speed Liquid and Ion Exchange Chromatography .. 464
Bound-Monolayer Cation Exchangers for the Analysis of Biochemically Significant Molecular Species 555

Liquid Chromatography

Analysis of Carbamate Insecticides by Fluorogenic Labelling and High-Speed Liquid Chromatography 40
Application of High Speed Liquid Chromatography to the Qualitative Analysis of Compounds of Propellant and Explosives Interest 51
High Resolution-Low Pressure Liquid Chromatography 76
Analysis of Phenols by Derivatization and High-Speed Liquid Chromatography 85
Reproducibility and Efficiency of Columns Packed with 10 μ Silica in Liquid Chromatography 139
Separation of Aromatic Amine Isomers by High-Pressure Liquid Chromatography on Cadmium-Impregnated Silica Gel Columns 191
High Speed Recycle Chromatography Using an Alternate Pumping Principle 197
High-Speed Radiochemical Separations by Liquid-Liquid Chromatography Using CSP Support. II. Separation of Metal Ions Using Tricaprylmethylammonium Chloride on Zipax 200
High Pressure Liquid Chromatography Equipment—II 425
Selectivity in Reversed-Phase Liquid Chromatography Using Chemically Bonded Stationary Phases 433
Optimization of Column Design and Operating Parameters in High Speed Liquid Chromatography 438
Chemically Bonded Stationary Phases—Preparation and Application to High Speed Liquid Chromatography 486
A Comparison of Photometric Detectors for High Speed Liquid Chromatography 499
High Pressure Liquid Chromatography with Porous Styrene-Divinylbenzene Polymer Packing 507
Use of High Pressure Liquid Chromatography for the Separation of Drugs of Abuse 512
High Speed Liquid Chromatographic Separations of Phthalic Esters, Carbohydrates, TCA Organic Acids and Organic Mercury Compounds 517
High Performance Ion Pair Partition Chromatography: The Separation of Biogenic Amines and Their Metabolites 521
Description and Performance of an 8 cm i.d. Column for Preparative Scale High Pressure Liquid-Solid Chromatography 564
The Analysis of Mixtures of Closely Related Naturally-Occurring Organic Compounds Using High Performance Liquid Chromatography 570
High Pressure Liquid Chromatographic Analysis of Barbiturates in the Picomole Range by Fluorometry of their DANS-Derivatives 655
Determination of the Psychotropic Drug Thioridazine and its Metabolites in Blood by Means of High Pressure Liquid Chromatography in Combination with Fluorometric Reaction Detection 779
Design and Evaluation of Electrochemical Detectors for HPLC 747
High Performance Liquid-Liquid Partition Chromatography on Porous Silica Microspheres 753

Liquid-Liquid Chromatography

High-Speed Radiochemical Separations by Liquid-Liquid Chromatography Using a CSP Support. I. Performance of Quaternary Ammonium Chloride-Zipax System for the Elution of Cd (II) with HCl 11

Liquid-Solid Chromatography

The Examination of Some Commercially Available Silica Gel Adsorbents for Use in Liquid Solid Chromatography 473

Thin-Layer Chromatography

Data-Pair Technique, a New Approach to Quantitative Thin-Layer Chromatography 392

7.2 Related Techniques

Mass Spectrometry

The Use of A Tantalum Switching Valve to Achieve High Reliability in a GC/MS System 505
Analysis of Tissue Steroids by Liquid-Gel Chromatography and Computerized Gas Chromatography-Mass Spectrometry 535
A Liquid Chromatography/Mass Spectrometry System Providing Continuous Monitoring with Nanogram Sensitivity 574
Anticonvulsant Drug Monitoring by GC-MS-COM Techniques 630
Real-Time Gas Chromatography/High Resolution Mass Spectrometry and its Application to the Analysis of Physiological Fluids 647
Characterization of Amino Acids by Pyrolysis/Gas Chromatography/Mass Spectrometry of their Phenylthiohydantoin Derivatives 668
Gas Chromatography-Mass Spectrometry of Catecholamines and Tryptamines: Determination of Gas Chromatographic Profiles of the Amines, Their Precursors and Their Metabolites 701
Atmospheric Pressure Ionization (API) Mass Spectrometry. Solvent-Mediated Ionization of Samples Introduced in Solution and in a Liquid Chromatography Effluent Stream 725
Method of Analysis of Urinary Steroids of Human Pregnancy by GLC and GC-MS of Sephadex LH-20 Chromatographic Fractions 763
